NATIONAL VICTORY GARDEN CONFERENCE

. . . Any program for the development of gardens for victory must include the growing of trees, shrubs and flowers for the health of the mind, as well as vegetables for the health of the body, because ornamental gardening is a vital and absolutely essential part of American life today, and its value as a stimulus to national, physical and spiritual well being is beyond calculation. The conservation and expansion of the home garden is, therefore, a goal that must be maintained.

It has already been pointed out by the Secretary of Agriculture that, in urban areas particularly, growing flowers and shrubs seem wiser than to tear up yards and playgrounds for the sake of trying to grow a few vegetables as was done during the last war.

It is the view of this committee that the facilities offered by this broad framework should be utilized to encourage in every feasible way those phases of gardening which deal with flowers, shrubs, trees and other plants that are essentially ornamental in character. By assigning these to their proper and justified place in the whole gardening for victory plan the full potentialities and benefits of the national plan can best be attained.

ROSES

These roses have been selected from the maze of varieties generally offered, because we believe they are the best. Not only are they beautiful, but are good practical garden roses, hardy and easily grown. Only strong healthy plants have been selected and grown in large pots.

EMPIRE PEAT SOIL SPONGE

Invariably the addition of peat moss or similar organic material will improve the physical condition of soil. Careful tests of many products resulted in the selection of this soil sponge. Its advantages are many—it binds sandy soil—loosens clay soils and is extremely useful as a mulch or top dressing. Furthermore, it increases soil bacteria and releases the necessary nitrogen essential to plant growth—stimulates root growth—provides drainage and prevents water logging, but conserves moisture. Being well seasoned and correctly ground it is ready for immediate use.

One cubic yard will cover 1200 square feet to a thickness of approximately $\frac{1}{4}$ inch.

Conditions of Sale

Contracts—Due to conditions beyond our control all orders and contracts accepted, are subject to government regulations and availability of labor and supplies.

Orders Are Accepted Subject to prior sale, and to condition of stock at delivery date, under the following terms.

Goods in Transit—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

Claims must be made within **five days** after receipt of goods.

Prices in this catalogue cancel all previous lists and quotations, are subject to change without notice and they are F.O.B. our nurseries, packing extra. The price columns indicate the unit price for each plant.

TERMS Cash—For customers of established credit accounts will be opened due in 30 days from date of invoice. Interest at six per cent (6%) per year will be charged on all accounts from due date. Orders for C.O.D. shipment must be accompanied by one-third of the amount.

Special Selection—Plant materials specially selected at the nursery will be sold at prices commensurate with the value of the specimens chosen, irrespective of the listed prices.

Ball and Burlap—The specification "B&B" in this list signifies digging with a ball of earth, which, where indicated, is included in the price. For digging all other items (not specified B&B) in this manner, there is an additional charge based upon the dimensions of the earth ball as follows:
